

SISU GTP 4X4 – Delivery to Finnish Army

The Finnish Army announced acquisition of SISU GTP 4X4 test series vehicles.

The vehicles will be used to collect information on their performance and usability to ensure that they can fulfil future capability requirements of the Finnish Defence Forces, both in Finland and in crisis management tasks. SISU GTP 4x4 is a modular wheeled armored vehicle developed by Oy Sisu Auto Ab. The vehicle comprise two objects, the backbone and the operation-specific crew body. With varied crew bodies, SISU GTP vehicles are suitable for most defense and security applications, e.g. as a troop transport, patrol and system vehicle.

Texelis has supplied T700 independent suspensions *.

With these independent suspensions, the vehicle offers a superior mobility in the most severe off road conditions.

This milestone strengthens the collaboration between Sisu and Texelis.

We wish for the tests be a success for the two companies !

**Developed in conjunction with Timoney*
